

Gain the leadership skills to meet every business challenge

IMI has partnered with hundreds of organisations to identify gaps in their leadership capabilities, designing tailored solutions to equip leaders with the ability to grow and sustain their organisations.

How IMI Can Help Your Organisation

From graduate programmes for future leaders, to empowering senior teams to lead with strategic intent, these are the stories of past and present IMI clients.

Top Teams

Acknowledged as a world-class programme, Leading with Strategic Intent greatly improves top teams' strategic influence and impact at a global level.

Women in Leadership

Shift the dial in female leaders by developing accelerators like purpose, empowerment, and addressing inhibitors like overwhelm, unconscious bias and power-play.

“

We believe strongly in the potential of our people and in the talented women who make up a valuable and growing part of our 48,000 employees across 36 countries around the world. We have paid keen attention to what our female leaders told us what they need to succeed, and worked closely with IMI to develop a bespoke leadership development programme which will enable the participants to achieve their full potential, with the expertise of the IMI and the support of each other, their mentors and our Senior Leaders.”
